Objective

A result oriented individual with a Masters in Computer Applications, seeking a suitable position in a reputed organization where I can use my extensive knowledge in web design and development and further learn new things and grow as a Web Developer.

Summary

- Currently interning as a web developer, gaining valuable experience in PHP and MERN stack development.
- Committed to learning and implementing coding standards and best practices to ensure high-quality web development.
- Pursuing excellence in web development standards through ongoing education and training.
- Enthusiastic about contributing to innovative projects and leveraging emerging technologies to drive efficiency and creativity in web development.

Skills

Languages/Web Development	PHP, HTML, CSS, JavaScript, JQuery, Ajax, React
Frameworks	Laravel, Codigniter, Express.js
Databases	MySQL, MongoDB
Tools	VsCode, Postman, SVN, FileZilla

Experience

Addealindia, Shyamal, Ahmedabad

Junior Developer - Intern
(January 2024 – June 2024)

- Efficiently contributed to the development and maintenance of software solutions at Addealindia, leveraging my newfound PHP and MERN stack expertise to drive innovation and efficiency.
- Engaged in continuous learning and exploration of emerging technologies to stay abreast of industry trends and further enhance my skills as a software developer intern.

Academic Projects

Property Wala – MERN

- **Seamless User Experience & Functionality:** Designed for admins, users and agents to ensure a comprehensive property management system.
- **Administrator Controls:** Admins can add, delete and manage properties, keeping the database dynamic and current.
- **Blog Panel:** Offers users the latest property news and updates, providing insights into market trends.
- **Personalized Property Search:** Tailored search options for users to find listings suited to their needs.
- **Direct Communication with Property Owners:** Enables transparent interactions between users and owners.
- **Admin Contact via Email:** Provides a straightforward channel for inquiries and feedback.

Sneakers Hub – PHP (Laravel)

- **Built on PHP Laravel:** Sneakers Hub offers a robust e-commerce experience with a smooth and user-friendly interface.
- **Three Distinct Roles:** Users, Admins (Sellers) and Superadmin each with tailored functionalities for efficient platform management.
- **User Features:** Users can browse products, add items to cart, mark favorites, get help, place orders and review products.
- **Admin (Seller) Capabilities:** Admin can add and update product descriptions, manage orders, and track product details.
- **Superadmin Control:** Superadmin can create, update and delete users and admins, manage stock, track order history and handle user-admin queries.
- **Intuitive UI Design:** The fantastic, easy-to-navigate interface enhances the user experience, making shopping enjoyable and straightforward.
